

# Forrester Names Juniper a Leader in Data Center Hardware Platforms for SDN

Automate your entire network, and take that next step toward multicloud, with consistent, end-to-end security and operations, from the data center to the business edge. Our approach allows workloads to run wherever you need to satisfy economic or experience requirements.

Beyond the data center, look to Juniper to help build a multicloud-ready network that spans the campus, branch, and public cloud. Here are just a few things we can help with:

## Data Center

- DevOps-style automation
- Upgrade servers from 1/10GbE to 25GbE
- DC consolidation/redundancy/expansion

## Campus

- Campus refresh/expansion
- Growth of IoT
- WLAN refresh (11ac Wave 2), multigig access needs

## Branch

- Device consolidation with virtualized network services
- WAN cost reduction
- Hybrid WAN for redundancy

## Public Cloud

- Lift-and-shift an application to the cloud
- New security or compliance regulations
- New cloud-native apps

## About Juniper Networks

Juniper Networks brings simplicity to networking with products, solutions and services that connect the world. Through engineering innovation, we remove the constraints and complexities of networking in the cloud era to solve the toughest challenges our customers and partners face daily. At Juniper Networks, we believe that the network

is a resource for sharing knowledge and human advancement that changes the world. We are committed to imagining groundbreaking ways to deliver automated, scalable and secure networks to move at the speed of business.
